

# It's ALL about Connectivity

star **TSP143III** <sup>USB</sup> futurePRNT

Charging + Data Transfer  
between iPad & Printer via  
Lightning to USB Cable.  
WiFi/Bluetooth **NOT** required.

## Star revolutionises POS terminal Device Choice with DIRECT iPad Receipt Printing via standard iPad / iPhone / iPod USB - lightning cable

Today retailers and restaurateurs have the choice of the traditional POS terminal or new and innovative tablet POS providing the flexibility and mobility increasingly required within retail and hospitality environments. However, concern for communication and connectivity issues has resulted in retailers being reticent to take advantage of the cost-savings of mobile tablet POS.

Managing a large estate of multiple tablets and paired Bluetooth devices means that it can be operationally difficult to maintain the right connection between the right peripherals and devices. The TSP143IIIU changes all this. As well as working with a traditional POS terminal, this printer can also connect directly to an iPad or iPhone using the Apple supplied lightning cable for reliable USB communication. As a result, the usual Bluetooth or WiFi / wired LAN set-up issues around pairing, network infrastructure, connectivity etc. are eliminated. **No other stand-alone POS printer can achieve this today!**

# ➔ TSP143III USB

## 58 / 80mm Receipts

## Printer Powered USB Device Data & Charging

2.4 Amp (max.)

## Auto Decurl Feature

No more curled receipts falling off the counter. Star's new "decurl" feature literally flattens the receipt before delivery.

## STAR CLOUD SERVICES

The new TSP143III USB works happily with Star's new Digital Receipting service AllReceipts. The printer immediately sends an image of the printed receipt with full colour promotional image or terms & conditions to the Cloud for anonymous retrieval by the customer - no need for phone number or email address. Retailers will now be able to receive instant feedback on customer satisfaction as well as provide promotional material on their customer's smartphone. The customer, in turn, will have an exciting new mobile App to manage their receipts digitally by date, type or retailer with backup & print facility. On line, real time device management also included.
